Professional Summary

Innovative Senior Backend & Cloud Engineer with 5 years of experience building scalable, secure enterprise solutions. Expert in Python, FastAPI, Django, Microservices, and AWS/GCP. Hands-on experience in RAG-based AI systems, vector databases, and LLM-powered application development. Strong background in CI/CD, containerization, event-driven architecture, and performance optimization. Passionate about designing automation, improving developer experience, and delivering business value through technology.

Work Experience

Senior Engineer - Cloud Services & Software

LTIMindtree | Sept 2023 - Present

- Developed new features and enhanced existing functionalities to meet evolving client requirements.
- Built a FastAPI-based service to automate JIRA API for generating and downloading reports.
- Integrated OAuth authentication for secure API access and data retrieval.
- Collaborated with cross-functional teams to deliver high-quality, scalable solutions.

Python Developer

Quixom Technology (Trootech Business Solutions Pvt. Ltd.) | Sept 2022 - July 2023

- Led Zoho Projects, Chats, and user data migration to a locally deployed Mattermost instance.
- Ensured zero downtime deployment and seamless data transfer with system integrity.
- Worked as a dedicated resource on a microservices architecture, utilizing queues, Docker, and cloud functions.

Python Developer

Ideepeners Pvt. Ltd. | April 2021 - August 2022

- Developed SaaS analytics integrating Shopify, GA, FB Ads
- Delivered high-availability deployments on AWS.

Jr. Python Developer

Dgrity Solutions Pvt. Ltd. | Oct 2019 - Oct 2020

- Assisted senior developers in Python/Django application development.
- Gained experience in API development, database optimization, and debugging.

Core Skills

- Backend: Python (FastAPI, Django, Flask), REST, GraphQL, OAuth2, WebSockets
- GenAI & Machine Learning: RAG Pipelines, LangChain, Hugging Face, OpenAI APIs, Vector Databases (FAISS, Pinecone), Embeddings
- Cloud & DevOps: AWS (EC2, Lambda, S3, RDS, CloudWatch), GCP (Schedulers, BigTable), Docker, Kubernetes, Terraform, GitHub Actions, Jenkins
- Database: PostgreSQL, MySQL, MongoDB, Redis
- Frontend: React, Next.js, JavaScript, Tailwind CSS
- Messaging & Distributed Systems: Kafka, RabbitMQ, Celery
- Others: Nginx, Async Architecture, Caching, Load Balancing, Monitoring, Logging

Key Projects

AI-Powered Resume–JD Matching System | RAG + Vector DB + FastAPI (2025)

- Designed and implemented a Retrieval-Augmented Generation (RAG) pipeline to evaluate candidate–role fit using semantic similarity between resumes and job descriptions.
- Extracted PDF & text using LangChain loaders, chunked with structured splitting.
- Embedded using OpenAI text-embedding-3-large; indexed in FAISS vector DB.
- Implemented vector similarity search + LLM-based re-ranking for high-precision matching.
- Built reasoning & scoring through OpenAI GPT-4.1 with structured JSON outputs.
- Integrated backend using FastAPI REST API for scalable HR automation.
- Enhanced matching accuracy by 30% vs simple cosine similarity baselines.
- Tech Stack: FastAPI, Python, LangChain, FAISS, OpenAI GPT-4.1, OpenAI Embeddings, PyMuPDF, Docker, uv

AI-Powered Natural Language SQL Query Assistant (FastAPI + LangChain + OpenAI + PostgreSQL)

- Converts business questions (NL) into SQL queries using OpenAI GPT-4.
- Executes SQL queries safely, retrieving validated results.
- Uses RAG-style schema awareness for accuracy & grounding.
- Provides explainable insights, not just data.
- Includes SQL safety guardrails (read-only, no DROP/UPDATE).
- Deployable for internal analytics teams.

ThehouseofMUSH | eCommerce Platform

- Developed a full-featured eCommerce platform with Django and Tailwind CSS.
- Integrated secure payment gateway (Razorpay), analytics, and user tracking for better sales insights.
- Implemented scalable architecture, performance optimizations, and a seamless shopping experience.
- Tech Stack: Django, PostgreSQL, Razorpay, JavaScript, jQuery, Tailwind CSS, Docker, AWS EC2.

Minstein | SaaS Analytics Tool

- Developed an analytics dashboard for Shopify, integrating Google Ads, Facebook Ads, and Mailchimp.
- Implemented data visualization, automated reports, and third-party API integrations.
- Tech Stack: Django, DRF, MySQL, MongoDB, AWS S3, Stripe, WebSockets

Flight Booking System

- Developed 30+ microservices for flight booking, notifications, transactions, and search.
- Used Flask for microservices and Django for the admin panel, with Kafka and Celery for event-driven processing.
- Tech Stack: Flask, Django, PostgreSQL, BigTable, Redis, RabbitMQ, Docker, Kubernetes

Siavite | Event Management SaaS

- Built a web-based platform for managing events, vendors, and customer bookings.
- Developed a vendor earnings dashboard with real-time analytics and automated invoicing.
- Tech Stack: Django, PostgreSQL, AWS RDS, Twilio, Stripe, jQuery

Education

Bachelor of Technology (B.Tech) in Electrical Engineering

Rajasthan Technical University | 2013

Soft Skills

- Problem Solving & Debugging
- Agile & Scrum Methodologies
- Effective Communication & Team Collaboration
- Leadership & Mentorship
